

## GAZETTEER

All grid references fall within 100km. square NC (29). The grid reference given is generally that of the 1km. square containing the name of the feature on the 1:50,000 map or, failing that, the 1:25,000. Exceptions are hills, where the grid reference is that of the summit, and a few other features, whose name has been displaced for cartographic reasons, where it is that of the feature itself. Historic names are in *italics*. Entries have been computer-sorted, which means that, in compound names, spaces take preference over letters; thus Loch Beannach comes before Lochan Fada.

A' Chleit.....	0220	Bàgh an t-Srathain.....	0721
Abhainn a' Chnocain .....	2209	Balchladich .....	0230
